Internet of Things Exhibition at St Joseph's University, Bengaluru

The Department of Computer Science, St Joseph's University, hosted its first Internet of Things (IoT) Exhibition on 29th September 2025. The event featured innovative projects developed and presented by Second Year MCA students, each designed to provide practical solutions to real-world problems through IoT applications. These projects were developed under the guidance of Mr. Mueen Pasha.

The exhibition attracted students and faculty members from multiple departments, as well as the First Year MCA students, who attended as juniors to observe and learn. The diverse audience actively interacted with the project teams and experienced live demonstrations.

Collaborations

Projects demonstrated creative and practical uses of IoT to address everyday challenges. Audiences were able to witness the prototypes in action and gain insights into their design and functionality. The event received encouraging feedback from both faculty and students, highlighting its academic and practical relevance.

This inaugural IoT Exhibition marked an important step in promoting applied learning, innovation, and interdisciplinary engagement within the university. It created a platform for students to translate classroom knowledge into impactful solutions, while also inspiring juniors to explore emerging technologies.
