

'Four-year honours degree programme impractical'

The Hindu Bureau

BENGALURU

Most of the experts, part of the meeting of the Working Group to Study the National Education Policy (NEP-2020), called by the Draft Commission of Karnataka State Education Policy (KSEP) on Wednesday, opined that four years of honours degree courses and multiple entry and exit options under NEP-2020 were "impractical".

Around 68 experts from various fields across the country were part of the meeting held in the city on Wednesday. During the discussion, a majority of the experts said that it is "unviable" to offer a four-year honours degree course and providing multiple entry and exit options was "unscientific".

The commission has called for another meeting on January 18 and decided to submit the interim report by the end of January.
